1050		<input type="checkbox"/> Refreshments and networking session
1120		<input type="checkbox"/> Fuel Availability in the Far East , by Mr. Simon Neo , Regional Manager – Asia, Integra Fuels Inc.
1140		<input type="checkbox"/> Refining and Bunker Fuel: 2020 Challenges by John H. Vautrain , Senior Vice President, Purvin and Gertz Inc. The challenges faced by the refining industry are greater than merely bunker fuel quality. The refining industry must find profitable investments to 2020 to meet the supply volume and quality requirements of the entire petroleum-consuming community using the available crude oils. The light end of the petroleum demand barrel is becoming more diesel-oriented and less gasoline-oriented. The heavy end of the demand barrel is growing more slowly or even shrinking but quality requirements are expanding. The role that bunker fuel of both high and low sulphur types will play in this future world will be discussed.
12:00		<input type="checkbox"/> Panel Discussions
